

Linked Repeater System

BARC maintains a permanently linked analog FM repeater system that provides coverage to a large geographical area that spans portions of southeastern Idaho to Salt Lake City. The system is open for use by all licensed amateurs. All repeaters are configured to receive and transmit a tone of 103.5 Hz. Autopatch is available by dialing *NNNNNNN (where N is the 7 digit phone number within the 435 area code). While four repeaters are linked full-time, a fifth repeater exists in the Cache Valley (147.200+) that can be manually linked to the rest of the system as needed. The DTMF command on 147.200+ to link is 220 and the command to un-link is 221.

Frequency	Call	Coordinates	Location
145.310-	WA7KMF	41.6369, -111.4156	Red Spur
146.720-	WA7KMF	41.7136, -111.7169	Mt. Logan
147.260+	WA7KMF	41.2578, -112.4408	Promontory
449.625-	WA7KMF	41.7136, -111.7169	Mt. Logan
